

What separates **nextuse™** from other ITAD vendors and recyclers?

With 35 years remarketing experience, NextUse maximizes asset value recovery and delivers a 25% higher ROI than typical recycling. We bring value to every project through:

- A global network of partners that meet requirements for various certifications including NAID AAA, ADISA, R2, e-Stewards, ISO 14001, ISO 18001, and others
- In-depth reporting and chain of custody using proprietary **securetrac™** asset tracking software
- Ethical and transparent operations – we share data on our revenue stream, gross profit, and the final disposition of every asset including the end point of all scrap
- Dedicated NextUse account reps who provide customized solutions and personalized customer service from project start to finish

Our digital data destruction facilities and specialists have multiple NAID AAA certifications for media sanitizing or degaussing, we offer physical destruction both on- and off-site, plus:

- Our facilities have manual and biometric locks, digital cameras, and motion sensors
- NAID conducts annual audits and unannounced inspections at our site and client sites and our staff is fully vetted, undergoing drug testing and background checks

IT Asset Disposition

We responsibly dispose of IT e-waste that is taking up valuable space and rapidly depreciating in value with our services that make the complex easy and minimize your time and effort.

Buyback Program

Sell your retired IT gear to us to put money back into your constrained budgets. Get fast quotes and the best return possible on resalable assets in order to reduce or eliminate your recycling costs.

Data Destruction

Safely and securely retire IT assets, protecting valuable data from criminals and competitors. Our certified destruction of data on cell phones, tablets, PCs, laptops, servers, printers, MFDs, etc. helps prevent ITAD-related data breaches, revenue loss, and brand damage.

Compliance

Our extensive knowledge and experience across industries ensure that companies comply with all environmental, data, and privacy laws and regulations such as RCRA, FERPA, COPPA, PCI, HIPAA, SOX, GLBA, and GDPR.

Eco-Friendly

We're committed to environmentally responsible reuse of assets whenever possible. Resorting to destruction and recycling is the last option.
